

MD NAZIMUL HAQUE

Data Engineer | Software Developer

Address Gazipur 1704

Phone 880-171-331364

E-mail

md.nazimul.haque@gmail.com

Result-oriented Programmer with more than 15 years of experience, specializing in application development and data processing. Adept at developing data-driven systems, and processing millions of records efficiently. Proficient in writing and optimizing complex queries, and analyzing data using Python. Proven skills in developing web apps using Laravel and Django, and desktop apps using C#. Experienced in mobile apps development using Java. Proven track record of collaborating in international environments through remote work with a US-based company. Highly motivated to learn and apply new technology stacks.

Work History

2022-08 - Current **Systems Analyst**

National University, Gazipur, Bangladesh

- Coordinate a team of programmers to process results of examinations on a timely fashion.
- Design and maintain databases for examinations management and results processing system.
- Use coordination and planning skills to publish results according to schedule.
- Apply knowledge of application components in conjunction with query tools to achieve business objectives.
- Analyze data-driven systems and recommend enhancements to comply with changing business needs.

2021-12 - Current **Programmer Analyst**

WoodyNet Inc., USA (Remote)

- Perform DNS query for millions of domains, for various query parameters, against a set of resolvers, store the responses, and analyze the data in order to detect patterns as well as malicious domains.
- Extract and analyze BGP snapshot data collected from various route collectors under Packet Clearing House
- Analyze network flow data, collected at different Internet Exchange Points (IXPs) in order to discover patterns and find answers to different queries.
- Working on a billing software for PCH (Packet Clearing House)

2013-11 - 2022-08 **Assistant Systems Analyst**

National University, Gazipur, Bangladesh

- Used various development tools in order to design and maintain databases for examinations management and results processing system.
- Analyzed existing systems and databases and recommended enhancements to comply with changing business needs.
- Applied knowledge of application components in conjunction with query tools to achieve business objectives.
- Participated in continuous improvement by generating suggestions, engaging in problem-solving activities to support teamwork.
- Used coordination and planning skills to achieve results according to schedule.

2010-09 - 2013-10

Assistant Programmer

Janata Bank PLC, Dhaka, Bangladesh

- Created database models and wrote procedures and functions in SQL Server and Oracle.
- Wrote complex SQL scripts in order to extract and analyze sensitive banking application data.
- Wrote and modified code in order to develop in-house software.

Selected Project Highlights

- An Android app presenting company stock info fetched from Yahoo! Finance API back in 2015.
- A Mobile Payment Broker App (Android) for users in Senegal that allows customers to make payments to merchants and service providers via SMS. A companion web dashboard for admins was also built.
- An Android app designed for tablets to assist people with short-term memory (Alzheimer's disease) to perform their daily activities.
- Customized a business directory app for Android platform named "Helpee" (<https://play.google.com/store/apps/details?id=io.ionic.helpee&hl=en>) that connects service seekers with local service providers.
- An Android app helping patients post feedback on doctors and doctors review them using a companion web dashboard.
- An Android app to track parcels.
- An Android app that helps detect and categorize implants for human body organs.
- An Android budgeting app that is aimed at maintaining someone's budget (accounts, income, and expenses) throughout a year.
- An Android app for inventory management in warehouse.
- An app for learning addition for Elementary School students. Developed with Flutter.
- A point of sale app for android with Laravel backend.
- Setting up Pleroma (a self-hosted social networking server) for importing Twitter backup archive data onto in as well as onto the Internet Archive Wayback Machine (archive.org).

- Participated in preparing DNS zonefiles for .ml (Mali), .ga (Gabon), .gn (Guinea), and .gh (Ghana) country code top-level domains (ccTLDs)
- Participated in a project for data analysis of Canadian network traffic data, collected from RIPE Atlas and different IXPs, situated at different geographic locations in Canada.
- Developed university students result processing system.

Education

2017-12

Master of Science: Computer Science And Engineering

Bangladesh University of Engineering And Technology - Dhaka

- CGPA 3.00 (on a scale of 4.00)
- Thesis Statement: "Polynomial Time Approximation Scheme for Efficient Execution of Stream Graphs on Multicores"
- Thesis URL: <http://lib.buet.ac.bd:8080/xmlui/handle/123456789/4849>

2008-02

Bachelor of Science: Computer Science And Engineering

Shahjalal University of Science And Technology - Sylhet, Bangladesh

- CGPA 3.29 (on a scale of 4.00)
- Thesis Statement: "Modification of DSR and its Implementation in Ad-Hoc City"
- Thesis Paper Published in the 10th International Conference on Computer and Information Technology (ICIT), held in December, 2007 in Dhaka, Bangladesh
- Thesis URL: <https://ieeexplore.ieee.org/document/4579445>

Software

Databases (SQL Server, MySQL) and SQL

Data Analysis (Python)

Web Apps Development (Laravel, Django)

Mobile Apps Development (Android, Flutter)

Desktop Apps Development (C#)

Languages

Bengali

Bilingual or Proficient
(C2)

English

Advanced (C1)

Skills

- Systems analysis

- Requirements gathering
- Software development
- Data management
- Data analysis
- Technical writing
- Code debugging
- Project documentation
- Coordination and leadership
- Analytical skills
- Continuous improvement
- Teamwork and collaboration
- Reliability
